Profile Summary

I am a Master's student on the MSc Advanced Computing with Artificial Intelligence at the University of Stirling (2025–2026), building on a First-Class BSc (Hons) Software Development with Cyber Security. I have gained practical skills and experience in the designing and developing processes for Java applications, SQL Databases, full stack development. I have also gained experience in ethical hacking, digital forensics, data security, hardware fundamentals, professionalism & ethics.

My interests lie in core functionality, software accessibility, information and software security. I am proficient in Java, HTML, CSS, JavaScript, with a working knowledge of C++, C#, Python, React and Flow. I am an excellent communicator with great interpersonal skills and a passion for delivering high quality outcomes.

My methodical and diligent approach to analysis, combined with my ability to incorporate accessibility requirements from the initial design, results in an end product that utilises a high standard of effective clean code.

Key Skills & Knowledge

Solution Analysis	Java Applications	Functional & Non-Functional Requirements
Solution Design	Python Scripting	Full Stack Development
Data Security	UML Diagrams	Waterfall & Agile Methodologies
Ethical Hacking	Digital Forensics	SQL Database Design & Programming
UX Design	OS Concurrency & Distribution	NoSQL & Data Warehousing
Statistical Analysis	Experience with R	Machine Learning

Education, Professional Qualifications and Awards

2025–2026	**University of Stirling** (funded & supported through The Data Lab scholarship)	MSc Advance Computing with Artificial Intelligence Data Lab Masters Scholarship Programme Employability Skills Data & AI Ethics Masterclass
2021–2025	**University of Stirling** (delivered in partnership with Forth Valley College)	BSc (Hons) Software Development with Cyber Security (First Class) MyStirling Award Gold with Green Leaf MyStirling Award Silver with Green Leaf MyStirling Award Bronze with Green Leaf HND Computing: Software Development (AA)
2021–2023	**Oracle Academy** (As part of fulfilment of HND at Forth Valley College)	Java Foundations Java Programming Database Design Database Programming with SQL
2019–2021	**Forth Valley College**	NC Computing with Cyber Security (PASS) Access to Computing (PASS) iDEA Bronze & Silver Award
2018	**Link Academy**	City & Guilds IT: Grade 1
2012–2019	**Braes High School**	1 NC: Communications (PASS) 3 National 5: Computing Science (A), Numeracy (PASS), Literacy (PASS) 1 National 4: Modern Studies (A) Smillie Award for Overcoming Barriers to Learning Certificate of Outstanding Effort for Computing Science Certificate of Outstanding Performance for Computing Science

Volunteering Experience

Forth Valley Student Association | Stirling Students Union | Sept 21 – May 22/Sept 23 – May 25

During my studies I have acted as a class representative to the Student Unions at both Forth Valley College and University of Stirling. I have represented both the year group and the individual modules. Specific responsibilities include:

- Attending Student Staff Feedback Committees and reporting my peers' feedback to lecturers.
- Attending departmental meetings to provide input on …
- Attending General Meetings, education zones, voting on motions based on feedback from peers, then communicating the outcomes
- Communicating events, opportunities, and data gathering from the Union's to my peers
- Signposting support and services within the University / College

Falkirk Pen Group | Camelon Local Learning Centre | February 2020 – March 2020

I worked with the Falkirk Pen Group, which supported adults with learning disabilities, long term health issues, and other vulnerabilities. This role/group did not continue during lockdown. Specific responsibilities included:

- Responsible for teaching basic tablet skills for android tablets and iPads.
- Raising cyber security awareness including recognising scams, how to respond to phishing emails, what to do if they believed they had become a victim of cyber-crime.
- How to utilise their tablets accessibility features
- The differences between Wi-Fi, cellular data and hotspots
- Accessing Falkirk Council services
- Protecting vulnerable users by increasing their knowledge and prioritising good outcomes based on their specific situations and needs

Falkirk Syrian Refugee Group | Camelon Local Learning Centre | January 2020 – February 2020

I volunteered with the Falkirk Syrian Refugee group to provide practical tech support while settling into the area. The majority of the members in this group knew how operate technology but required more nuanced support. I was responsible for supporting them in:

- Setting up new accounts to access Falkirk Council services
- Setting up new accounts with DWP and showing how to provide evidence
- Utilising translation software to translate webpages and assorted documents from English to Arabic
- Awareness of / teaching them to recognise common scams targeting Syrian Refugees.
- Treating service users with empathy and kindness, and creating a safe environment without shame

Westfield Community Centre | Camelon Local Learning Centre | March 2019 – June 2019

I worked over several months teaching skills to the elderly to help improve digital literacy. I was responsible for:

- Teaching basic laptop skills for windows laptops.
- Raising cyber security awareness, including good practice such as not plugging in unknown USB, recognising financial scams, how to manage an email account, ensuring basic security measures are in place, answering questions about malware what it can and can't do.
- Teaching internet skills, starting from accessing it and building confidence / literacy
- Boosting self-confidence with technical, e.g. operating a laptop/tablet
- Teaching practical skills such as downloading and printing documents
- Teaching basic solutions to common problems, such as connecting to Wi-Fi and troubling shooting plug-in peripherals
- Delivering session with empathy and without judgement, meeting the service users where they are at and adjusting my teaching
